

I Found A Leaf

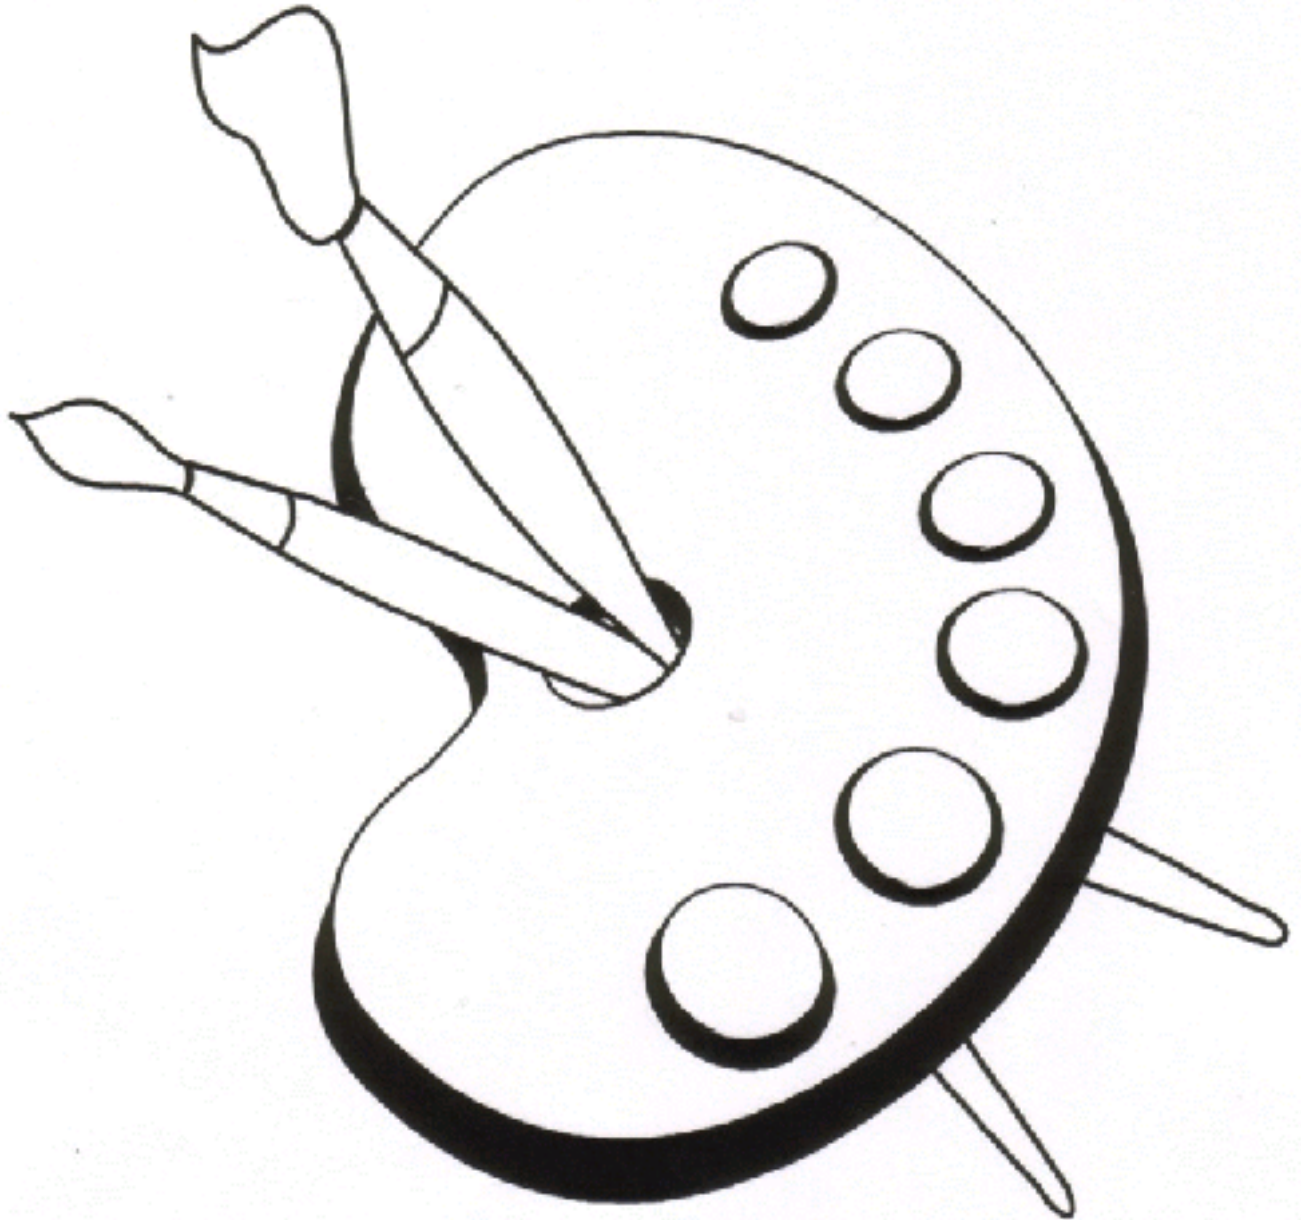

Teachers, have the children find the green leafy canopy on the coloured card (appendix 5). They can then stick it onto the tree. This activity is best completed after taking them for a walk and showing them one or two common trees for your areas. Have them collect a leaf and paste it next to the tree in the box provided (if it is a big leaf it may have to go on the back of the page, or just tape the stem so that the leaf goes across the page).

What's the Weather Like Outside?

Teachers, have the children find the two arrows on the coloured pages (the appendix sheets). Reinforce the black dot with sticky tape on the front and back of the page, attach the arrows using a split pin. Discuss what weather is and what sort of day it is outside. Move the arrows to correspond to the weather. This can be done each time the activity book is used.

I Know My Colours

Teachers, please help the children to paste the coloured circles of paint onto the palette. Have them colour the remaining circle a different colour of their choice. Help them to learn the colours and have them identify them.
